Wednesday - Friday

MODEL-EDC: Threats and tools for endocrine-disrupting pollutants in marine organisms

PROGRAMME

Monday, Nov 22 | Morning

Session 1. Overview and Monitoring programs for EDCs

Tuesday, Nov 22 | Afternoon

Organization of discussion groups; Identification of gaps and priority areas for improvement; Funding and networking

Tuesday, Nov 23 | Morning

Session 2. Current models for EDCs
Session 3. Assays and Tools

Tuesday, Nov 23 | Afternoon

Session 4. New approach methodologies and working group discussions. | Working groups.

The EuroMarine-funded foresight workshop **MODEL-EDC: Threats and tools for endocrine-disrupting pollutants in marine organisms** aims to tackle this issue by reviewing the current state of the art in terms of EDC threats and modelling and work out a path forward in order to support more robust monitoring programmes.

It bring together experts from different fields of eco-toxicology and endocrine-disruption and facilitate a discussion on current assays for evaluating and predicting the environmental risks of xenobiotics, how useful assays are for monitoring marine systems and the potential impact of xenobiotics on marine environments, challenges and future directions.

The event will take place from November 22nd - 23rd, online via Zoom.
